Definitions

1 Current value of mortgages

Total principal amount outstanding.

2 Arrears

This arrears multiplier is calculated as the arrears amount (which is the difference between the expected monthly repayments and the amount that has actually been paid, i.e. a total of under and/or over payments) divided by the monthly amount repayable. It is recalculated every time the arrears amount changes, i.e. on the date when a payment is due.

3 Defaults

For the purpose of the Bank of England Market Notice dated 30 November 2010 "defaults" is defined as properties been taken into possession.

4 1 month CPR

On any trust calculation date, the total principal receipts received during the immediately preceding trust calculation period divided by the aggregate current balance of the loans comprised in the trust property calculated on the previous trust calculation date in respect of the previous trust calculation period.

5 1 month annualised CPR

Calculated as $1 - ((1 - R)^{12})$ where R is (i) total principal receipts received scheduled and unscheduled during the relevant period, divided by (ii) the aggregate outstanding principal balance of the loans in the expected portfolio as at the start of that period.

6 3 month average CPR

The total principal receipts received during the immediately preceding trust calculation period for the last 3 months divided by the average aggregate current balance of the last 3 months of the loans comprised in the trust property.

7 3 month annualised CPR

Calculated as $1 - ((1 - R)^4)$ where R is (i) total principal receipts received scheduled and unscheduled during the relevant period, divided by (ii) the average aggregate outstanding

12 month average CPR

8

The total principal receipts received during the immediately preceding trust calculation period for the last 12 months divided by the average aggregate current balance of the last 12 months of the loans comprised in the trust property.

9 W

Savings balance.

10 X

104.4% of the aggregate of the FSCS excess amounts.

11 Y

Flexible drawings set-off risk.

12 Z

Breach of Mortgage Sale Agreement.

13 AA

Reward loans cashbacks.

14 Excess Spread calculation

After a review of the calculation and reporting, Excess Spread has been updated to include 4 reporting components:

1. Quarterly including Z Notes 2. Quarterly excluding Z Notes 3. Monthly including Z Notes 4. Monthly excluding Z Notes

In all cases Excess Spread is calculated by dividing excess cash available (pre and post Z Note payment) divided by a. Quarterly = the weighted average Funding Share for the relevant period and b. Monthly = the current Funding Share for the relevant period

Please note that, following approval of a consent solicitation with effect from October 2019, the reference rate in respect to the 2017-1 A2 and 2018-1 Class A3 changed from 3M GBP Libor to a Compounded Daily SONIA interest basis.
