Notes

1 Current number of mortgages

This is the sum of all product holdings secured by a borrower(s) on a single property.

2 Current value of mortgages

Includes all amounts of principal, interest and fees as yet unpaid by the borrower.

3 Funder Share

The percentage funder share is calculated net of accrued interest.

4 Seasoning

This is the age of the loan at the report date in months based on the Main Mortgage Completion Date.

Main Mortgage Completion Date is the date the borrower first took out a loan on the secured property. The initial loan may have been repaid and replaced by subsequent lending under the same mortgage agreement and updated terms and conditions.

5 Remaining term

This is the remaining term of the loan at the report date in months .

6 Product breakdown

Bank of England Base Rate Tracker Loans includes loans issued at a discount or premium to base rate.

All loans in the Discount category are linked to SVR.

7 Payment Type

Most loans that are not fully repayment mortgages comprise an interest only portion, on which there are no scheduled principal repayments and a repayment portion for which there is a scheduled amortisation.

8 Loan to Value (LTV) at Last Valuation

Further advances may be made on existing loans based on the indexed LTV without carrying out a formal valuation. This occasionally gives rise to the unindexed LTV recording an unrealistically high LTV. Indexed and unindexed LTVs include all further advances on a loan - but exclude any flexible drawdown reservoir.
