Appendix

Economic momentum slowed in February with 30-year high inflation and rising cost of living

GDP¹
(% m/m growth)

February impacted by storms hitting construction output and falling health sector activity

CPI Inflation¹
(% y/y growth²)

Reached a 30-year high of 7% as petrol and food prices rose sharply

Unemployment¹
(ILO³, % Unemployment rate)

Down to pre-pandemic rates with record vacancies and a smaller workforce

HPI
(Halifax House Price Index, % y/y growth)

Strong growth underpinned by robust demand and lack of supply

Outlook remains uncertain with different forecasts from analysts and markets

GDP¹
% Annual average

Slower economic growth due to high inflation and negative real wage growth into 2023

Unemployment^{1,2}
% Annual average

Expected to remain tight although cost pressures and rising Bank Rate will add to constraints facing businesses.

CPI³
% Annual average

High inflation expected to remain in 2023, worsened by supply constraints and higher agriculture prices.

Bank Rate views⁴

Markets remain more hawkish than analysts.

Strong Q1 2022 results with higher operating income

Q1 2022
vs Q1 2021¹

| | Statutory | Adjusted ² |
|--------------------------|-----------------|-----------------------|
| Net interest income | £1,053m +14% | £1,053m +14% |
| Non-interest income | £122m +31% | £105m +50% |
| Operating expenses | £581m -19% | £528m -5% |
| Credit impairment losses | £52m n.m. | £52m n.m. |
| Provisions | £47m -63% | £44m +47% |
| Profit before tax | £495m +183% | £534m +29% |

- Net interest income up 14%, following liability repricing actions and the impact of base rate increases.
- Non-interest income up 31% largely due to the cost of wholesale funding liability management in Q1 21 which was not repeated.
- Operating expenses down 19%, largely related to lower transformation spend. Adjusted operating expenses down 5% with efficiency savings.
- Credit impairment losses of £52m, reflecting the potential risk that higher inflation could impact unsecured lending repayments and an uplift applied to mortgage probability of default. Stage 3 ratio was 1.50%.
- Provisions decreased 63%, largely related to lower transformation programme charges following significant restructuring in 2021. Adjusted provisions up 47% including higher fraud charges.

1. See slide 32 for the consolidated income statement for Q122. Operating expenses is before credit impairment (losses)/ write-backs, provisions and charges. Provisions is for other liabilities and charges. | 2. Non-IFRS measures. See Quarterly Management Statement for the three months ended 31 March 2022 for more information.

2022 outlook

- We expect Banking NIM to be above 2021 following base rate increases.
- Inflation is likely to impact operating expenses in 2022, however we expect this will be offset by savings from our transformation programme.
- The increased cost of living will affect our customers and could impact affordability of unsecured lending. To date, we have not seen any deterioration of credit quality, our unsecured lending and BTL portfolios are relatively small. 85% of our loans are retail mortgages with an average LTV of 40%.
- We expect our growth in mortgage lending to be broadly in line with the market.

1. Average spread is the weighted margin above SONIA for issuance in that calendar year. | 2. Includes €1.75bn CB which settles in April. | 3. Includes issuances from Santander Consumer Finance UK. | 4. Earliest between first call date and maturity date. | 5. Including TFSME.

Continued resilience through strong capital position

- The CET1 capital ratio decreased 40bps to 15.5%, this was largely as a result of regulatory changes that took effect from January 2022, which included the reintroduction of the full CET1 deduction for software assets and the implementation of the new regulatory guidance related to definition of default. Without these one-off regulatory changes, the CET1 capital ratio would have remained broadly flat in the period.

Capital positioning against dual regulatory requirements

- Our AT1 and CET1 outstanding amounts are driven by leverage
- From an RWA perspective part of our T2 requirements are met with CET1 and AT1
- At 31 March 2022 SanUK's P2A capital requirement remained with an RWA percentage based element

| Capital and leverage | Dec 19 | Dec 20 | Dec 21 | Mar 22 |
|-------------------------|--------|--------|--------|--------|
| CET1 ratio (%) | 14.3 | 15.2 | 15.9 | 15.5 |
| RWAs (£bn) | 73.2 | 72.9 | 68.1 | 69.4 |
| UK leverage ratio (%) | 4.7 | 5.1 | 5.2 | 5.1 |
| Leverage exposure (£bn) | 269.2 | 259.0 | 246.3 | 248.1 |

1. Distribution restrictions expected to apply if Santander UK's CET1 ratio fell between current Regulatory Minimum Capital level, equal to CRD IV 4.5% minimum plus Pillar 2A and the CRD IV buffers. | 2. At 31 March 2022, Santander UK Group Holdings plc and Santander UK plc Pillar 2A requirements were 5.27% (2.97% CET1).

- SanUK passed the BoE stress tests without the need for management actions
- In the BoE 2021 SST, SanUK had one of the lowest CET1 drawdown across UK banks, the 4.0% drawdown compares favourably to our current 5.5% buffer to MDA and 7.3% buffer to reference rate

RWA Loss Absorbing Capacity HoldCo requirements^{1,2}

- Santander UK is fully compliant with end state MREL requirements, being RWA constrained
- In January 2022, we issued c.£1.25bn equivalent of new senior HoldCo. We have issued the call notice for an existing €500m MREL security with a call date of 18th May 2022 and called a \$1bn existing MREL security back in January
- We expect to issue between £2bn - £3bn of MREL in 2022, of which we have already issued £1.25bn equivalent. £1.2bn has been called in 2022 and c£0.8bn of existing Santander UK senior unsecured debt will also become ineligible.
- MREL recapitalisation management buffer is sized by the value of HoldCo senior unsecured securities due to become MREL ineligible during the following 6 months plus a buffer for FX movements

1. At 31 March 2021, Santander UK Group Holdings Pillar 2A requirements was 5.27%. | 2. Combined Buffer Requirement includes CCB 2.5% and CCyB 0% and will be met exclusively with CET1.

Structural hedge evolution

Balance of structural hedge

Yield from Sonia historic and forward³ swap rates

- Our structural hedge reduces the economic impact of the volatility of short-term interest rate movements on the balance sheet
- Structural hedge consists primarily of fixed rate mortgages, yield is therefore driven from swap rates that would have swapped fixed rate mortgages to floating assets
