150%	£1.45
100%	£1.45

B.2	<p>Domicile / legal form / legislation / country of incorporation The Issuer is a public limited company incorporated and domiciled in England and Wales, registered under the Companies Act 1985.</p>
B.4b	<p>Trend information</p> <p>Despite recent improvements in certain segments of the global economy, uncertainties remain concerning the future economic environment. Uncertainty surrounding future economic developments of the Eurozone remains an issue and interest rate differentials among Eurozone countries still indicate continued doubts about some governments' ability to fund themselves sustainably and affect borrowing rates in those economies.</p> <p>The global credit market conditions have suffered from the general lack of liquidity in the secondary market for many types of instruments which may include instruments similar to the Securities.</p> <p>The Group faces substantial competition in all parts of its business. The market for UK financial services is highly competitive and the recent financial crisis continues to reshape the banking landscape in the UK.</p> <p>Financial services providers face increasingly stringent and costly regulatory and supervisory requirements, particularly in the areas of regulatory capital and liquidity management, the conduct of business, the structure of operations and the integrity of financial services delivery. Increased government intervention and control over financial institutions, together with measures to reduce systemic risk, may significantly impact the competitive landscape.</p>

The Issuer is a direct wholly owned subsidiary of Santander UK plc (the "Guarantor") and, along with the Guarantor's other subsidiaries, forms part of the Santander UK group (the "Santander UK Group"). The Guarantor is a wholly owned subsidiary of Santander UK Group Holdings Limited, which is a subsidiary of Banco Santander, S.A. which is the ultimate parent company. The Guarantor and its subsidiaries, along with the other subsidiaries of Banco Santander, S.A., form part of the Banco Santander S.A. group (the "Santander Group").</p>

Unaudited financial information included for comparative purposes in these sections as at 31 December 2013 and for the nine months ended 30 September 2013 has been adjusted since its original publication to reflect the adoption of IFRIC Interpretation 21 ("IFRIC 21") and its impact on the timing of the recognition of the charge for the Financial Services Compensation Scheme.</p> <p>* In May 2013, the IFRS Interpretations Committee issued IFRIC 21 which provides guidance on accounting for the liability to pay a government imposed levy. IFRIC 21 is effective in the EU for annual periods beginning on or after 17 June 2014, however, earlier application is permitted and Santander UK has elected to do so. This interpretation clarifies that the obligating event that gives rise to a</p>

liability to pay a government levy is the activity that triggers the payment of the levy as set out in the relevant legislation. An entity does not have a constructive obligation to pay a levy that will be triggered by operating in a future period. The adoption of IFRIC 21 changed the accounting for the Financial Services Compensation Scheme, but did not affect the accounting for any other government imposed levy paid by Santander UK.

SECTION D – RISKS

Element	
D.2	<p>Key risks regarding the issuer and the guarantor</p> <p>In purchasing Securities, investors assume the risk that the Issuer and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Securities. There are a wide range of factors which individually or together could result in the Issuer and the Guarantor becoming unable to make all payments due in respect of the Securities. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and the Guarantor's control. However, the Issuer and the Guarantor have identified in the Base Prospectus a number of factors which could materially adversely affect their businesses and ability to make payments due under the Securities and the Guarantee, and they consider that the risks identified in the Base Prospectus include all the principal risks of an investment in the Securities. These include:</p> <ul style="list-style-type: none"> • the Group's operating results, financial condition and prospects may be materially impacted by economic conditions in the UK as well as regulatory capital, leverage and liquidity requirements imposed on the Issuer and the Guarantor;
	<ul style="list-style-type: none"> • the Group's operating results, financial condition and prospects may be negatively affected by conditions in global financial markets; • the Group's financial results are constantly exposed to market risk. The Group is subject to fluctuations in interest rates and other markets risks, which may materially and adversely affect it;
	<ul style="list-style-type: none"> • any reduction in the credit rating assigned to the Group, any member of the Group or to any Group debt securities would be likely to increase the Group's cost of funding, require additional collateral to be placed and adversely affect its interest margins and liquidity position; • the Group operates in a highly regulated environment that imposes costs and significant compliance requirements. Changes in regulations may increase the cost and complexity of doing business, or may disadvantage the Group relative to its competitors. The failure to comply with regulations could subject the Group to sanctions, force it to cease providing certain services, or oblige it to change the scope or nature of its operations; • customers and counterparties that owe the Group money, securities or other assets may default on their obligations to the Group due to bankruptcy, lack of liquidity, operational failure or other reasons; and • the Group's future success depends to a significant degree upon the continued contributions of its key personnel, its ability to recruit, train, retain and motivate personnel, and to ensure that employment contract terms are appropriate.
D.3	<p>Key risks regarding the Securities</p>

	<ul style="list-style-type: none"> • There are also risks associated with specified types of Securities and with the Securities and the markets generally, including that, unlike a bank deposit, the Securities are not protected by the Financial Services Compensation Scheme ("FSCS") or other government protection scheme. As a result, neither the FSCS nor any other government will pay compensation to an investor in the Securities upon the failure of the Issuer and/or the Guarantor. If the Issuer and/or the Guarantor go out of business or become insolvent, holders of the Securities may lose all or part of their investment in the Securities; • investors in Securities may lose up to the entire value of their investment in the Securities as a result of the occurrence of any of (a) the insolvency of either the Issuer and/or the Guarantor, (b) investors seeking to sell the Securities prior to their scheduled termination, (c) the relevant Securities being subject to certain adjustments in accordance with the terms and conditions of the Securities, and (d) amounts payable being subject to deductions for taxes and/or expenses; • the Securities represent direct, unconditional, unsecured and unsubordinated obligations of both the Issuer and the Guarantor and rank equally without any preference among themselves with all other present and future direct, unconditional, unsecured and unsubordinated obligations of the Issuer and Guarantor; • the market value and the amount payable on termination of the Securities may be adversely affected by a number of factors, and the price at which a holder of Securities may be able to sell Securities prior to termination may be at a substantial discount to the market value of such Securities on the Issue Date. A holder of such Securities may suffer a loss of some or up to all of the entire amount invested on termination; • the Securities will have no established trading market when issued, and one may never develop, or the Securities may be illiquid. In such case, investors may not be able to sell their Securities easily or at favourable prices; and • the Securities will be settled by the Issuer through one or more clearing systems and agents. In addition investors may hold Securities through one or more intermediaries. As a result it may be necessary to enforce rights under the Securities through such indirect holding structure and delays and settlement risk may exist as a result.
	<p>Additionally, the risks relating to investment in the Securities depend on their features and may include, inter alia, risks relating to (but not limited to) operational/business risk, credit risk, liquidity risk, interest rate risk, regulatory risk, reputational risk, competition risk, unsecured obligations, market risk, emerging market risk, hedging and potential conflicts of interest, tax liabilities, expenses and taxation, third party risk, structural risks relating to particular Securities, including with respect to certain underlyings, no claim against the reference item(s) to which the Securities relate, exchange rate risks, settlement disruption, illegality and cancellation, time lag after redemption or exercise, settlement risk, possible illiquidity of Securities, equity risk, currency risk, underlying volatility risk, fund risk, failure to deliver due to illiquidity, inflation risk, modification, meetings, market disruption, a requirement to hold a minimum amount of Securities, transfer restrictions, exchange, listing and legal regulation risk, risk arising from Calculation Agent discretion, over-allotment risk, risk relating to the discontinuation or withdrawal of the offer period, risk relating to inventory securities issues prior to their date of purchase, risk arising in the event the United Kingdom joins the European Monetary Union and eurosystem eligibility risk.</p> <p>Additionally, the risks relating to investment in the Warrants include, <i>inter alia</i>, risks relating to (but not limited to) factors affecting the value and trading price of Warrants, the minimum exercise amount, and limitations on exercise and early exercise.</p>
D.6	<p>Risk Warning See D3 above. In addition:</p> <ul style="list-style-type: none"> • investors in Securities may lose up to the entire value of their investment in the Securities as a result of the terms of the relevant Securities where invested amounts are subject to the performance of variable benchmarks such as equities, indices, fixed income benchmarks and exchange traded funds;
	<ul style="list-style-type: none"> • the Issue Price of the Securities may be more than the market value of such Securities as at the Issue Date, and the

	price of the Securities in secondary market transactions;
	<ul style="list-style-type: none"> • if the relevant Securities include leverage, potential holders of such Securities should note that these Securities will involve a higher level of risk, and that whenever there are losses such losses may be higher than those of a similar security which is not leveraged. Investors should therefore only invest in leveraged Securities if they fully understand the effects of leverage; and • warrants may expire worthless. In addition, where "Automatic Exercise" is not specified in the applicable Final Terms, if Warrants are not exercised by the investor on the applicable exercise date, an investor's investment in the Warrants will expire worthless.

SECTION E – OFFER

Element	
E.2b	<p>Use of proceeds</p> <p>The net proceeds from each issue of Securities will be applied by the Issuer for its general corporate purposes. If, in respect of any particular issue, there is a particular identified use of proceeds, this will be stated in the applicable Final Terms.</p> <p>The net proceeds from the issue of Securities will be applied by the Issuer for its general corporate purposes.</p>

The Authorised Offeror has selected the Warrants as one of the primary qualifying securities into which the Authorised Offeror will invest on behalf of investors in the Plan. The proceeds invested by investors in the Plan will be used by the Authorised Offeror to purchase the Warrants. It is understood that the performance of the Plan will be related to the performance of the Warrants throughout the term of the Warrants. Accordingly, the amounts payable by the Authorised Offeror on the retirement of the Plan are linked to the amounts paid by the Issuer pursuant to the terms and conditions of the Warrants.</p>
	<p>The Issuer has offered and will sell the Warrants to the Dealer (and no one else) at the price of 100.00 per cent.
