

Managing your money

Tips to help you stay in control of your
current account and credit card

How to use this brochure

We want to make managing your money as simple as possible.

This brochure gives you useful information on how our current accounts and credit cards work and explains what certain terms mean. We've also included some tools and checklists so you can keep track of your money and avoid fees.

We hope you find this helpful, but if you have any questions at all, please get in touch with us.

Understanding your balance

In Online and Mobile Banking you might see up to 3 balances – a **Current balance**, **Balance including pending** and **Overdraft remaining** and these might be different.

Balance including pending – This is your current balance including any payments due to come out of your account. This doesn't include your arranged overdraft limit.

Overdraft remaining – This is the amount of arranged overdraft you have available to use. If you don't have an arranged overdraft limit in place, you won't see this.

Debit card purchases

Your **Balance including pending** takes into account your recent debit card payments before the money is taken from your account. We reduce the available amount in your bank account by the amount of the transaction to prevent you from spending the money twice. When the seller then requests the payment, normally within a few days, it'll be reflected in your **Current balance** once the money leaves your account.

On occasions where the request for payment takes longer, charges might be applied to your account if your balance no longer has enough money to cover the transaction at the time the seller decides to withdraw the money.

Paying in cash

If you pay in cash over the counter at a Santander branch or at a cash machine, it will show in all of your balances straightaway.

Paying in cheques in branch

Your **Current balance** will be adjusted immediately, but your **Balance including pending** and **Overdraft remaining** will only be adjusted when the money is available to spend.

Cheques you've written

When the recipient bank has processed the cheque, all of your balances will be adjusted at the same time.

Payments to and from your current account

Some transactions and payments don't always happen instantly and might not clear for a number of days. The table below shows the timescales you can expect for different types of transactions to be fully processed and show on all balances:

Transaction	Timescales
Cheques in	Up to 2 working days
Cheques out	This depends on when the recipient bank processes the cheque
Card payments	Up to 4 working days
Direct Debit	Straightaway on the day the transaction is scheduled
Standing order	Straightaway on the day the transaction is scheduled
Faster payment	Usually in a matter of hours

Tips for managing your money

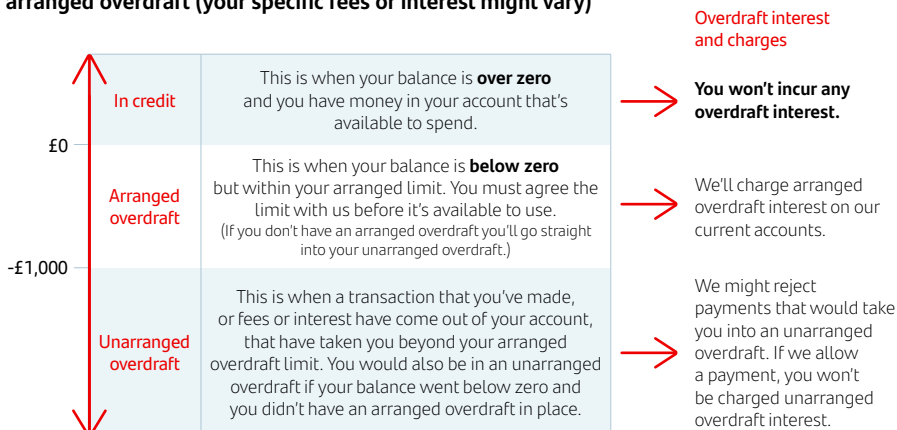

Make sure you keep track of your balance regularly to see when transactions have cleared. See page 3 for tools to help you do this.

Overdrafts explained

An overdraft can give you a bit of extra money for unexpected times. However, it's important to remember that we charge you to use it.

Here's an example of how it works for a customer with a £1,000 arranged overdraft (your specific fees or interest might vary)

Did you know?

Avoiding interest: You can avoid overdraft charges by paying in money to your account on the day you went overdrawn, as long as the payment is received before the cut-off time on that day.

Free account alerts: We'll automatically send you an account alert to warn you when you don't have enough money in your account to cover a payment, so you can put money in before the cut-off time and avoid the charges. For more information, see page 5.

For more information on this please visit santander.co.uk/personal/support/current-accounts/overdrafts

To set up an arranged overdraft

- ✓ Log on to Online Banking
- ✓ Call us on **0330 9 123 123**
- ✓ Visit your local branch

Overdrafts depend on your circumstances and you must repay any overdraft when we ask in line with our General Terms and Conditions.

Managing your payments on your credit card

The best way to stay in control of your credit card payments is to set up a Direct Debit. You can set this up through Online Banking, by visiting a Santander branch or by calling us on **0330 9 123 123**.

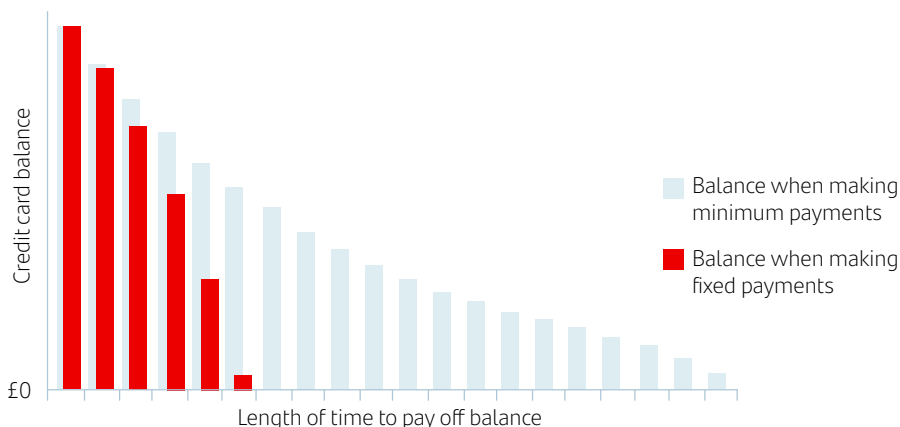

You have a choice of options in terms of how much you pay each month. You can pay:

- the full balance
- the minimum monthly payment
- a fixed amount of your choice.

You can also make one-off payments to your credit card using Online or Mobile Banking.

Regularly making only the minimum payment increases the overall cost of borrowing and means it will take you longer to pay off your balance.

You'll pay your balance off quicker if you set up a monthly fixed payment that's the same as your **current** minimum payment because your payments will remain fixed while your minimum payment will reduce. If you can afford it, you'll clear your balance even quicker if you set up a fixed payment that's **higher** than your current minimum payment. You can see your current minimum payment on your statement. You can also use our **repayment calculator** to see how small changes in monthly payments can make a difference.

The above diagram is for illustrative purposes only and assumes no further spend on the credit card.

You can find more information at [santander.co.uk](https://www.santander.co.uk). We've written a guide on how to understand the features and benefits of your credit card and how payments are applied to your account. Go to any of our credit card pages and look for '[Find out more about how credit cards and credit card offers work](#)'. You'll find this in the 'How it works' section.
