

Information about the Santander Personal Pension Investment Pathways

In summary

Investment Pathways are simple investment options available to you when you move your pension savings into flexi-access drawdown.

They're designed to help you choose how to invest your pension if you haven't taken financial advice - aiming to make your choices clearer for you.

Each pathway links to a single fund matched to your retirement plans over the next 5 years. Your money then stays invested in a way that aims to suit your retirement goals.

Are Investment Pathways right for me?

They may be right for you if:

- you've reached the minimum pension age and you're thinking of accessing your pension
- you want a simple investment option without having to research where to invest or to make complex investment decisions
- you're comfortable making your own financial decisions without receiving financial advice and you haven't had financial advice in the last 12 months
- you plan to move some or all of your pension savings into flexi-access drawdown and want your money to stay invested.

They might not be right for you if:

- you'd prefer personalised investment advice based on your circumstances
- you want to choose your own funds or investment strategy.

How do Investment Pathways work?

- Each Pathway is linked to a Santander fund, chosen by Santander UK plc and managed by Santander Asset Management UK Limited. The funds chosen aren't specific to each customer's circumstances.
- You can only select 1 Investment Pathway at a time, but you can switch between them if your plans change. You can also move out of an Investment Pathway and choose your own investments at any time.
- When you choose an Investment Pathway, all of your pension pot will be invested in that fund. This includes any money in your pension that you've not moved into your flexi-access drawdown pot.
- If Santander UK plc decides to change the fund for the Investment Pathway you've chosen, your investment will be switched to the new fund within that Investment Pathway. We'll let you know if this happens.

When will Investment Pathways be available to me?

You'll be offered Investment Pathways when you move some or all your pension savings into flexi-access drawdown. However, if you've received advice for your drawdown, Investment Pathways may not be suitable for you.

What else should I know?

- There are no additional charges for investing in or switching between Investment Pathways.
- Investment Pathways are designed around a 5-year investment time horizon. But you can change your choice at any time.
- Once your money is in your drawdown pot, you can access your money flexibly from that pot at any time. You can take one-off lump sums or choose a regular income.
- You can still buy an annuity or take all your remaining money as cash later if you want.
- As with all investments, the value of your pension can go down as well as up.

Next steps

If you think Investment Pathways are right for you, read the information we've given you below. This includes links to the Key Investor Information Document (KIID) and Factsheet for each Investment Pathway fund. They include details of the underlying funds' objectives and investment policy. They'll help you decide if choosing an Investment Pathway is right for you and which one best matches your retirement plans.

The 4 Investment Pathways

Investment Pathway 1

I have no plans to touch my money in the next 5 years.

Your money will be invested in Santander MyWealth Balanced. This is a medium risk fund which aims to achieve long term capital growth whilst staying within set risk levels over a 5+ year term. It does this by investing in a portfolio with a range of shares and bonds. It typically has between 35% and 65% of its assets invested in company shares.

MyWealth Balance KIID

MyWealth Balance factsheet

Investment Pathway 2

I plan use my money to set up a guaranteed income (annuity) within the next 5 years

Your money will be invested in Santander Sterling Bond Portfolio. This is a lower risk fund which aims for stable returns rather than high growth by investing in bonds (primarily corporate bonds). At least 70% of its bond investments are denominated in Sterling.

Investment Pathway 3

I have plans to start taking my money as long-term income within the next 5 years

Your money will be invested in Santander MyWealth Moderate. This is a lower medium risk fund which aims to achieve moderate capital growth whilst staying within set risk levels over a 5+ year term. It does this by investing in a portfolio with a range of shares and bonds. It typically has between 20% and 50% of its assets invested in company shares.

Investment Pathway 4

I plan to take all my money within the next 5 years

Your money will be invested in Santander MyWealth Cautious. This is a lower risk fund which aims to achieve stable returns with some growth potential whilst staying within set risk levels over a 5+ year term. It does this by investing in a portfolio with a range of shares and bonds. It typically has between 5% and 35% of its assets invested in company shares, and over 50% invested in bonds.
