All information in this document is valid as at 30 September 2024, unless otherwise stated.

For the most up-to-date information and any additional information on the Model Portfolios, please contact your Private Banker or Financial Planning Manager.

Past performance is not a guide to future performance. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means an investor may not get back the amount invested.

01

Risk warnings

There are a number of factors which affect the level of risk. Where relevant, potential investors should take the following factors into account before investing.

Key risks materially relevant to the Funds in which Santander Premium Investments Model Portfolios have exposure to:

- **Bond risk:** Increases in inflation and interest rates, reduction in issuer creditworthiness and other risks related to bonds can reduce their value.
- **Capital gains tax risk:** There may be capital gains tax implications for any rebalancing of Portfolios held outside of an ISA.
- **Charge increase risk:** Charges may go up by more than is expected in the future. This means the value of your investment after charges may be less than expected.
- **Climate risk:** Climate change is an evolving risk which may affect the value of the underlying investments of a Portfolio. Climate change risk includes i) transition risks which are risks associated with markets transitioning to a lower-carbon economy and ii) physical risks which may be acute (e.g. extreme weather events) or chronic (e.g. longer term shifts in climate patterns such as sustained higher temperatures). For the avoidance of doubt, none of the Portfolios are managed with reference to climate change.
- **Collective Investment Schemes (CIS) risk:** CIS that the Model Portfolio invests in may have different risks or investment policies (for example, invest in different assets, geographies or use derivatives more extensively) to your Model Portfolio.
- **Counterparty risk:** The failure of a company providing services to the Portfolio may cause financial losses. This includes services like keeping assets safe.
- **Country risk:** Investing all or mostly in a single country or region can be riskier than a Portfolio that invests more broadly.
- **Currency risk:** The value of investments that are not in pound sterling may be affected by changes in exchange rates.
- **Derivatives risk:** Derivatives are highly sensitive to price movements. Some derivatives may generate additional volatility in the value of the underlying fund and may result in the underlying fund being leveraged.
- **Inflation and interest rate risk:** Inflation and interest rate rises may mean the value and return of your Portfolio is reduced. During periods of sustained high interest rates, it might be difficult for the Manager to achieve their stated investment objective.
- **Investment style and management risk:** The investment style chosen and the assets selected to deploy this style may deliver returns that are inferior to alternative choices.
- **Liquidity risk:** It may be difficult to sell some investments, or to sell them without making a loss which may reduce the value of your Portfolio.
- **Non-developed market risk:** These markets are more volatile than developed markets. Dealing, settlement and custody issues could arise.
- **Political, legal and regulatory risk:** There is a risk that the value of a Portfolio's investments may be affected by uncertainties such as international political developments, civil conflicts and war, changes in government policies, changes in regulation, changes in taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.
- **Public health issues and pandemic risk:** Public health issues and pandemic risks may threaten the economy and reduce the value of assets. It may also cause issues with the Manager and service providers to the Portfolio.
- **Smaller and medium sized companies risk:** Share prices of smaller and medium sized companies can go up and down more and may take longer to sell than shares of larger companies.
- **Stock market risk:** The value and income of shares can go up or down. This can be due to changes in how the market views the company, industry, or economy.
- **Value of investment risk:** The value of your investment and any income is not guaranteed and you may get back less than the original amount you invested.

Please note the risks related to each Fund the Premium Model Portfolios are invested in can be found in its Key Investor Information Document (KIID). More information about other risks can be provided on request from your adviser.

02

Santander Premium Investments Model Portfolios

Premium Investments are provided by Santander UK plc. Santander Asset Management UK Limited (SAM UK) has been appointed by Santander UK, as your agent, to construct and manage these Model Portfolios.

As instructed by and agreed with Santander UK, the Model Portfolios are comprised exclusively of SAM UK funds within the Santander Premium Fund range, except where exposure to a permitted geographical asset class is not available within the Santander Premium Fund range. In this instance, SAM UK will invest directly into third party funds which are available on the Santander Investment Hub.

SAM UK receives a model portfolio management fee and also an annual management charge for Santander Premium Funds, where relevant.

For information on how the markets have performed in the last quarter and the market outlook, visit our **Market Update** webpage.

Past performance is not a guide to future performance. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means an investor may not get back the amount invested.

Santander Premium Investments Model Portfolios

September 2024

Santander High Stability

Model portfolio overview

Launch Date	03 Jan 2001
-------------	-------------

Time Horizon	5 years +
--------------	-----------

Actual Ongoing Charge Figure	0.58%
------------------------------	-------

Model Portfolio Service Fee	0.25%
-----------------------------	-------

All fees are per annum.

Costs and charges

The funds that the Model Portfolio invests in will each have an Ongoing Charge Figure (OCF) which is the expected total charges and expenses as a percentage of the underlying funds and can vary over time. These underlying funds also have transaction costs associated with them. The estimated level of the transaction costs will be disclosed to you by your Santander UK adviser before you invest in the service. Transaction costs are the costs which the underlying funds incurs when buying and selling assets and are in addition to the OCF.

SAM UK will charge a Model Portfolio Service Fee for making day to day investment decisions relating to the Model Portfolio. These include asset allocation and selecting the individual funds that make up the Model Portfolio. The fee will be 0.25% of the Model Portfolio value each year. SAM UK also charges an Annual Management Charge (AMC) for the management of the In-House Funds the Model Portfolio invests in. These fees do not include any fees paid to Santander UK for advisory or platform services.

Other charges apply which are described within the Investment Hub - Key Features Document. Please ask your Santander UK adviser for more information on these charges.

Performance data is calculated on a model portfolio basis, so you will need to refer to the Santander Investment Hub or your adviser for details regarding your specific investment.

Objective and Policy

The Model Portfolio aims to beat inflation and achieve a better return than cash over the long term (5 years plus), while experiencing high stability in line with that of bonds.

The Model Portfolio will be managed to stay within Santander UK's Lower Medium Risk Category. The Model Portfolio is designed for investors who are prepared to accept the level of risk in line with Santander UK's Lower Medium Risk Category. For more information about the Santander UK risk categories, please speak to your Santander UK adviser.

The Model Portfolio is actively managed and aims to achieve the objective by gaining exposure to Bonds (UK Corporate and Government, Overseas Corporate and Government, High Yield), Equities (UK, US and European) and Cash. The eligible assets may also include some or all of Exchange Traded Funds, Investment Trusts or other asset types notified by the Santander ISA Managers Limited as eligible for inclusion in the Model Portfolio.

As instructed by and agreed with Santander UK, the use of In-House funds is permitted. The Model Portfolio will be comprised exclusively of In-House Funds within the Santander Premium Fund Range, except where exposure to a permitted geographical asset class specified above is not available within the range.

High Stability	8.98%	-16.29%	2.84%	5.75%	11.93%

Five year cumulative performance

● High Stability

Source of performance data: Santander Asset Management, calculations as at 30 September 2024 in GBP and net total return.

Past performance is not a guide to future performance. The value of your investment can fall as well as rise and you may not get back the original amount you invested. Please note that the value of any foreign investments may be affected by changes in currency exchange rates.

Santander Premium Investments Model Portfolios

This factsheet contains holdings and performance data for the Model Portfolio. There will be differences in the holdings and performance of your own individual portfolio. Please log on to the Santander Investment Hub to see the holdings for your individual portfolio.

Risk and reward information

The funds that the Model Portfolio invests in have associated risks which should be considered, these risks are defined in the underlying funds Key Investor Information Documents.

In addition, Santander UK categorises each Model Portfolio into one of 6 risk categories from Very Low Risk to High Risk, based on what an extreme level of loss could be over the future investment horizon.

Santander UK have categorised Santander High Stability as Lower Medium Risk based on that scale. SAM UK will manage the Model Portfolio in line with this risk rating, and from time to time may manage it in a way that reduces its risk rating to Lower Risk to help the Model Portfolio achieve its objective.

For more information about the Santander UK risk categories, please speak to your Santander UK adviser.

About the Model Portfolio

This Model Portfolio forms part of Santander UK's Model Portfolio Service. Santander Asset Management UK Limited (SAM UK) has been appointed by Santander UK, as your agent, to construct and manage this Model Portfolio in line with its objective and policy outlined in this factsheet.

A Model Portfolio is a selection of investment funds and cash which will be used as a reference for your individual portfolio. SAM UK defines this list of assets acting within the parameters of the Model Portfolio's Objective and Policy as agreed with Santander UK. Santander UK is responsible for assessing your suitability for the Model Portfolio Service and investment in line with this Model Portfolio. Santander ISA Managers Limited is appointed by Santander UK to create and administer your portfolio so that it is aligned to the Model Portfolio. However, it will not match exactly at any given point. This means the performance of your portfolio will differ to the performance of the Model Portfolio which is shown in this factsheet. Over time your Portfolio will become different to the Model Portfolio that it references because of market movements, and/or because the design of the Model Portfolio changes. When this difference becomes too great, your Portfolio will be re-aligned to the Model Portfolio and hence, to its objectives. This is called rebalancing, which is performed by your model portfolio administrator. For more information, please see the Santander Investment Hub Terms and Conditions.

Model Portfolio Manager

Multi Asset Solutions UK Team

The Multi-Asset Solutions UK (MAS UK) team is part of a functional unit known as Global Multi-Asset Solutions (GMAS). The MAS UK team benefits from investment specialists with decades of cumulative experience in managing portfolios across a wide range of investment strategies and market environments and access to the research and infrastructure provided by the GMAS unit.

About the Model Portfolio

This Model Portfolio forms part of Santander UK's Model Portfolio Service. Santander Asset Management UK Limited (SAM UK) has been appointed by Santander UK, as your agent, to construct and manage this Model Portfolio in line with its objective and policy outlined in this factsheet.

A Model Portfolio is a selection of investment funds and cash which will be used as a reference for your individual portfolio. SAM UK defines this list of assets acting within the parameters of the Model Portfolio's Objective and Policy as agreed with Santander UK. Santander UK is responsible for assessing your suitability for the Model Portfolio Service and investment in line with this Model Portfolio. Santander ISA Managers Limited is appointed by Santander UK to create and administer your portfolio so that it is aligned to the Model Portfolio. However, it will not match exactly at any given point. This means the performance of your portfolio will differ to the performance of the Model Portfolio which is shown in this factsheet. Over time your Portfolio will become different to the Model Portfolio that it references because of market movements, and/or because the design of the Model Portfolio changes. When this difference becomes too great, your Portfolio will be re-aligned to the Model Portfolio and hence, to its objectives. This is called rebalancing, which is performed by your model portfolio administrator. For more information, please see the Santander Investment Hub Terms and Conditions.

Model Portfolio Manager

Multi Asset Solutions UK Team

The Multi-Asset Solutions UK (MAS UK) team is part of a functional unit known as Global Multi-Asset Solutions (GMAS). The MAS UK team benefits from investment specialists with decades of cumulative experience in managing portfolios across a wide range of investment strategies and market environments and access to the research and infrastructure provided by the GMAS unit.

September 2024

Santander Grow Real Wealth

Model portfolio overview

Launch Date	03 Jan 2001
-------------	-------------

Time Horizon	5 years +
--------------	-----------

Actual Ongoing Charge Figure	0.70%
------------------------------	-------

Model Portfolio Service Fee	0.25%
-----------------------------	-------

All fees are per annum.

Costs and charges

The funds that the Model Portfolio invests in will each have an Ongoing Charge Figure (OCF) which is the expected total charges and expenses as a percentage of the underlying funds and can vary over time. These underlying funds also have transaction costs associated with them. The estimated level of the transaction costs will be disclosed to you by your Santander UK adviser before you invest in the service. Transaction costs are the costs which the underlying funds incur when buying and selling assets and are in addition to the OCF.

SAM UK will charge a Model Portfolio Service Fee for making day to day investment decisions relating to the Model Portfolio. These include asset allocation and selecting the individual funds that make up the Model Portfolio. The fee will be 0.25% of the Model Portfolio value each year. SAM UK also charges an Annual Management Charge (AMC) for the management of the In-House Funds the Model Portfolio invests in. These fees do not include any fees paid to Santander UK for advisory or platform services.

Other charges apply which are described within the Investment Hub - Key Features Document. Please ask your Santander UK adviser for more information on these charges.

Performance data is calculated on a model portfolio basis, so you will need to refer to the Santander Investment Hub or your adviser for details regarding your specific investment.

Objective and Policy

The Model Portfolio aims to increase the value of your investment, to grow real wealth and spending power over the long term (5 years plus).

The Model Portfolio will be managed to stay within Santander UK's Medium High Risk Category. The Model Portfolio is designed for investors who are prepared to accept the level of risk in line with Santander UK's Medium High Risk Category. For more information about the Santander UK risk categories, please speak to your Santander UK adviser.

The Model Portfolio is actively managed and aims to achieve the objective by gaining exposure to Bonds (UK Corporate and Government, High Yield), Equities (UK, European, US, Japan, Asia Pacific Exc. Japan), Cash or other, such as alternatives, depending on the exposure of the underlying fund holdings. The eligible assets may also include some or all of Exchange Traded Funds, Investment Trusts or other asset types notified by the Santander ISA Managers Limited as eligible for inclusion in the Model Portfolio.

As instructed by and agreed with Santander UK, the use of In-House funds is permitted. The Model Portfolio will be comprised exclusively of In-House Funds within the Santander Premium Fund Range, except where exposure to a permitted geographical asset class specified above is not available within the range.

GLOSSARY OF TERMS

Alternatives: Any investment other than shares and fixed income, such as property and absolute return funds.

Asset allocation: The proportion of a fund invested in different asset classes, i.e. shares, bonds, cash, property, geographic regions or industry sectors, in order to achieve the highest expected returns for the lowest possible risk.

Benchmark: An index which is used as a standard to measure and compare a security, mutual fund or an investment manager for characteristics such as performance, sector exposure, weightings and risk.

Bid to bid: A bid price is the price a buyer is willing to pay for a stock or a security. Bid to bid basis is the beginning and the end bid price that is then used to calculate the performance return.

Bond: A bond is a loan issued by a government or a company. When you buy a bond, the issuer promises to pay a certain amount of income until the bond redeems and is repaid by the issuer. The strength of that promise varies by the issuer of the bond. This is known as creditworthiness.

Commodities: Raw materials or products that have a market value and can be traded on an exchange. Examples include precious metals such as gold, industrial metals such as aluminium, or agricultural goods such as wheat.

Default: If a company or individual defaults, this means they are unable to make the required payments on their debt obligations.

Derivative: A financial security that is traded between two parties and that gets its value from how an underlying investment or group of investments performs.

Emerging markets: Markets in those countries in the early stages of development, which have sufficient size and liquidity and are receptive to foreign investment. These include, but are not limited to, the following markets: Brazil, Russia, China, India, South Africa, and emerging European markets.

Fixed income: Also known as fixed interest. A group of asset classes that involve debt, this is usually in the form of bonds where an issuer will lend money for a predefined period and these can be issued by governments or companies. These will involve a regular coupon (interest) payment and the return of capital (original amount lent) at the maturity of the bond.

Investment grade: A rating that signifies relatively low risk of default. Independent rating agencies such as Moody's and Fitch will provide this rating.

Key Investor Information Document (KIID): The Key Investor Information Document (KIID) is a regulatory document that provides key information about each share class of each fund. It helps investors compare different funds and assess which fund meets their specific needs.

Leverage: Leverage is the use of various financial instruments or borrowed capital, such as margin, to increase the potential return of an investment.

Liquidity: Refers to the ease with which an asset or security can be sold and converted into readily available cash without a drastic change in its market price.

Net income reinvested: The returns shown in the performance tables within the Factsheets are after income has been reinvested back into the fund, after tax has been deducted.

Near cash: Assets that can be quickly liquidated into cash or cash-like assets.

Open-Ended Investment Companies (OEICs): An Open Ended Investment Company (OEIC) is a type of company or fund in the United Kingdom structured to invest in other companies with the ability to constantly adjust its investment criteria and fund size.

Property: Property or real estate investment refers to land, buildings or both purchased with the intention of earning a return on the investment either through rental income, the future resale of the assets, or both.

Shares (often referred to as equities or stocks): In investing, this is a share of ownership in a company. Investing in a fund gives exposure to underlying share prices without investors actually owning the shares themselves.

Value companies: Companies that are currently trading below what they are worth and thus could provide a better return over the long-term.

Volatility: The extent to which the value of an investment fluctuates over time.

Important Information

For retail distribution.
