#### Glossary

Arrears  For the purposes of the Asset Coverage Test, arrears are calculated in accordance with standard market practice in the U.K. A mortgage is identified as being in arrears when, on any due date, the overdue amounts which were due on previous due dates equal, in the payments. In making an arrears determination, the servicer calculates as of the date of determination the difference between the sum of all monthly payments that were due and payable by a borrower or any due date up to that date of determination and the sum of all payments actualy made by that borrower up to that date of determination. If the result arrived at by dividing that difference (if any) by the amount of the required current mon account is deemed to be in arrears. Arrears classification is determined based on the number of equivalent full current monthly payments that have been missed. A borrower that has missed payments that in the aggregate equal or exceeding 2 monthly payments (bit against its less than 3 monthly payments) being a feeting the classified as being 2 to <3 monthly a rount is reared as being in default if it is 3 or more monthly in arrears.	ggregate amount of all authorised ent monthly payment equals or exceeds 1 the
