	For the purposes of the Asset Coverage Test, arrears are calculated in accordance with standard market practice in the UK. A mortgage is identified as being in arrears when, on any due date, the overdue amounts which were due on previous due dates equal, in the aggregate, one or more full monthly payments. In making an arrears determination, the servicer calculates as of the date of determination between the sum of all monthly payments that were due and payable by a borrower or any due date up to that date of determination less the aggregate amount of all authorised underpayments made by such borrower up to stud date of determination and the sum of all payments actually made by the account is deemed to be in arrears. Arrears classification is determined based on the number of equivalent full currently payment equals or exceeds 1 the account is deemed to be in arrears. Arrears classification is determined based on the number of equivalent full currently payments made to be in arrears. Arrears classification is determined based on the number of equivalent full currently payments that have been missed. A borrower that has missed payments that in the aggregate equal or exceeding 2 monthly payments (but for which the aggregate of missed payments is less than 3 monthly payments) would be classified as being 2 to <3 months in arrears, and so on. An account is treated as being in default if it is 3 or more months in arrears. For the purposes of investor Reporting, if unpaid at the end of the reporting period, the due amounts which were due on the latest due date are included in the aggregate
