

Santander UK Group Holdings plc

Update

Key Rating Drivers

UK Retail and Commercial Bank: Santander UK Group Holdings plc's (SGH) ratings are based on the group's stable and low-risk business model, solid retail banking franchise, conservative risk appetite, low levels of impaired loans though recent credit cycles, adequate capitalisation and stable funding and liquidity profile. They also reflect a less diversified business mix than larger UK peers, with a relatively small non-retail franchise and limited income from fee-generating business lines, which weakens the group's profitability.

Healthy Asset Quality: SGH has observed little deterioration in asset quality to date, with a low 1.4% Stage 3 loans ratio at end-1H21. Fitch Ratings expects the ratio to increase, possibly to 2% or 3% by end-2022, based on the agency's latest forecasts for UK unemployment and GDP growth, and this would remain consistent with our current assessment of asset quality.

Resilient Profitability Expected: Lower loan impairment charges over the next two years combined with the group's ongoing cost reduction programme should support the recovery and resilience of SGH's operating profit. We expect the ratio of operating profit/risk-weighted assets to remain over 1% on average over the rating horizon.

Adequate Capitalisation: The group's common equity Tier 1 (CET1) capital ratio is expected to remain adequate on a fully-loaded basis in 2021 and 2022. Capitalisation will face some downward pressures due to regulatory effects, including the expected reversal of software intangibles treatment in 2021.

Stable Deposit Base: SGH's funding benefits from a solid and granular retail deposit base. The group has proven access to wholesale funding markets and also benefits from the potential for ordinary support from its parent, Banco Santander, S.A. (A-/Stable). Liquidity is prudently managed.

Standalone Strength Drives Ratings: In Fitch's view, SGH's parent, Banco Santander, has a strong propensity to support its UK subsidiaries given their strategic importance as well as the high reputational risk of a default. However, because Fitch's assessment results in a 'BBB+' Long-Term Issuer Default Rating (IDR) based on institutional support, SGH's IDRs are driven by its stand-alone credit profile, as reflected in its Viability Rating (VR).

Rating Sensitivities

Slower than Expected Recovery: The ratings are primarily sensitive to changes in the VR, which could be downgraded in the event of an unexpected severe setback to the economic outlook or if the financial repercussions of rising unemployment and pandemic-related economic disruptions are worse than our assumptions. A downgrade could be triggered if the Stage 3 loans ratio was expected to increase above 3% without a clear path to reduction, or if the group was unable to execute strategic targets.

Limited Upside Potential: The most likely trigger for an upgrade would be a significant increase in the diversity of its business model without significantly increasing its risk appetite and while maintaining solid capitalisation and funding.

Source: Fitch Ratings

SGH's ultimate parent, Banco Santander, is subject to a multiple point of entry resolution plan with SGH and its subsidiaries being a single point of entry resolution group. SGH is the holding company of Santander UK plc (San UK) and Santander Financial Services plc (SFS). It acts as the UK sub-group's issuing entity for loss-absorbing capital, facilitating a single point of entry resolution approach, which is the approach preferred by the UK Prudential Regulation Authority.

The Long-Term IDR of SGH's main operating bank, San UK, is notched up once from its VR. This is because senior creditors of San UK benefit from a buffer of qualifying junior debt and eligible holding company (SGH) senior debt which could be bailed-in to protect San UK's senior debt from default in the event of failure.

The IDRs of SFS are based on support from SGH. They reflect Fitch's view that SGH has a strong ability and propensity to support SFS given this subsidiary's role within the group as well as its small size relative to SGH.

San UK's DCR is at the same level as its Long-Term IDR because derivative counterparties have no preferential status over other senior obligations in a resolution scenario under UK legislation.

Debt Ratings

The senior unsecured debt instruments of all entities are rated in line with the Long-Term IDRs of the respective entities.

The ratings of all subordinated debt and hybrid securities issued by SGH and San UK are notched down from their VRs.

SGH's additional Tier 1 capital securities are rated four notches below SGH's VR to reflect above-average loss severity risk (two notches) and higher risk of non-performance as coupon payments are fully discretionary (two notches). Dated Lower Tier 2 instruments are notched down twice from the VR for loss severity.

Legacy Tier 1 securities issued by San UK are rated four notches below San UK's VR to reflect higher loss severity risk (two notches) and higher risk of non-performance due to discretionary coupon payments (two notches).

Legacy upper Tier 2 securities are rated three notches below San UK's VR (two for loss severity and one for non-performance). Legacy dated Lower Tier 2 instruments are notched down twice from the VR for loss severity.

Significant Changes

UK Sovereign Rating Outlook Revised to Stable

On 18 June 2021 Fitch revised the Outlook on the UK's 'AA-' sovereign rating to Stable from Negative. The revision reflects macroeconomic, labour market and fiscal outturns since the start of 2021 which have shown the UK economy and public finances to be more resilient to the impact of the pandemic than Fitch had expected.

Outlook Revised to Stable from Negative

We have revised the Outlooks on the IDRs of SGH and its subsidiaries to Stable from Negative. This is because we believe the challenges for the UK economy from the coronavirus pandemic have subsided sufficiently to remove the negative outlook on the UK operating environment score.

Businesses have adapted better to working within economic restrictions, and the greater resilience of private consumption and investment have resulted in an upward revision of Fitch's real GDP growth forecast for 2020 and 2021 to minus 9.8% and (plus) 6.6%, respectively, with growth moderating to 5.0% in 2022. We expect the unemployment rate to average just 5.4% in 2021, supported by the extension of income and job-support schemes and the continuation of fiscal and pandemic-related loan support to businesses.

We have also revised the trends to stable from negative on our assessments of management and strategy, asset quality and earnings. The group has continued to progress with its cost-reduction programme after a short pause in its branch closures and redundancies due to the coronavirus pandemic. While net cost savings of GBP200 million by FY22 may be delayed slightly, we expect them to continue to mitigate profitability pressure. In addition, risks to asset quality have decreased since the start of the pandemic, due to a more-resilient-than expected economy as well as the strong performance of the housing market.

UK Housing Market Outlook

The UK residential mortgage market performed better than expected in 2020 and 1H21. Mortgage delinquencies remain at cyclically low levels, supported by tighter underwriting standards over the past decade, continued low interest rates and a strongly performing UK labour market. They are currently being supported by the government's job retention scheme and payment holidays, both of which are to remain in place until September.

Institutional Support Assessment

SGH and Santander UK plc's Support Ratings of '2' reflect Fitch's view that their ultimate parent, Banco Santander S.A., has a strong propensity to provide support but that its ability to provide support is constrained by the subsidiaries' large size and by possible regulatory restrictions. The Support Rating indicates a 'BBB+' rating floor for SGH's Long-Term IDR. Our view of Banco Santander S.A.'s strong propensity to provide support is based on the strategic importance of the UK business to Banco Santander S.A. as well as the high reputational risk it would face in the case of a default by its UK subsidiaries.

Environmental, Social and Governance Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. ESG issues are credit neutral or have only a minimal credit impact on SGH, either due to their nature or the way in which they are being managed by SGH. For more information on our ESG Relevance Scores, visit www.fitchratings.com/esg.

FitchRatings Santander UK Group Holdings plc

Credit-Relevant ESG Derivation

Santander UK Group Holdings plc has 5 ESG potential rating drivers

- Santander UK Group Holdings plc has exposure to compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security) but this has very low impact on the rating.
- Governance is minimally relevant to the rating and is not currently a driver.

				Overall ESG Scale

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Company Profile; Management & Strategy; Risk Appetite
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Company Profile; Management & Strategy; Risk Appetite
Labor Relations & Practices	2	Impact of labor negotiations, including board/employee compensation and composition	Company Profile; Management & Strategy
Employee Wellbeing	1	n.a.	n.a.
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Company Profile; Financial Profile

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Operational implementation of strategy	Management & Strategy
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal/compliance risks; business continuity; key person risk; related party transactions	Management & Strategy; Earnings & Profitability; Capitalisation & Leverage
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Company Profile
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Management & Strategy

CREDIT-RELEVANT ESG SCALE	
How relevant are E, S and G issues to the overall credit rating?	
5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
