COLLATERAL

Note	Collateral Postings	Counterparty

There was no collateral posted during the reporting period 01-Jun-14 to 30-Jun-14

TRIGGER EVENTS	
Asset	
Amount debited to AAA Principal Deficiency Sub Ledger, unless certain criteria are met	None
Non Asset	
Insolvency Event occurs in relation to Seller	None
Sellers role as Servicer terminated & new Servicer is not appointed within 60 days	None
The then current Seller Share is less than the adjusted Minimum Seller Share for 2 consecutive Trust Calculation Dates	None
The aggregate outstanding principal balance of Loans in the Mortgages Trust is less than the required loan balance amount specified in the most recent	
final terms	None
An arrears trigger event will occur if:	
The outstanding principal balance of the Loans in arrears for more than 3 times the monthly payment then due divided by the	
outstanding principal balance of all of the Loans in the Mortgages Trust (expressed as a percentage) exceeds 2 per cent.	
Full details of all trigger events can be found within the Fosse Master Issuer plc base prospectus	

Notes

1 Current number of mortgages

This is the sum of all product holdings secured by a Borrower(s) on a single property.

2 Current value of mortgages

Includes all amounts of principal, interest and fees as yet unpaid by the Borrower.

3 Funding 1 Share

The percentage Funding 1 Share is calculated net of accrued interest.

4 Seasoning

This is the age of the Loan at the report date in months based on the main mortgage completion date.

Main mortgage completion date is the date the Borrower first took out a loan on the secured property. The initial loan may have been repaid and replaced by subsequent lending under the same mortgage agreement and updated terms and conditions.

5 Remaining term

This is the remaining term of the Loan at the report date in months.

6 Product breakdown

Bank of England Base Rate Tracker Loans includes Loans issued at a discount or premium to base rate.

All Loans in the discount category are linked to SVR.

7 Payment Type

Most Loans that are not fully repayment mortgages comprise an interest only portion, on which there are no scheduled principal repayments and a repayment portion for which there is a scheduled amortisation.

8 Loan to Value (LTV) at last valuation

Prior to 2008, Further Advances were made on existing Loans based on the indexed LTV without carrying out a formal valuation. This occasionally gives rise to the unindexed LTV recording an unrealistically high LTV. Indexed and unindexed LTVs include all Further Advances on a Loan - but exclude any flexible drawdown reservoir.

9 Defaults

For the purpose of the Bank of England Market Notice dated 30 November 2010 "defaults" is defined as properties taken into possession.

10 X

Current balance of Loans in the portfolio multiplied by 3.4%

11 Y
Flexible draw capacity (flexible drawdown reservoir of live sub-accounts) multiplied by 8% multiplied by 3%

12 Z

Balance of flexible redraws and Further Advances covered by CCA

13 Excess spread calculation

Excess spreads is calculated by dividing (excess cash available for payments below the General Reserve Fund in the waterfall) by (the Funding 1 Share)

14 1 month CPR

On any trust calculation date, the total principal receipts received during the immediately preceding trust calculation period divided by the aggregate current balance of the loans comprised in the trust property calculated on the previous trust calculation date in respect of the previous trust calculation period.

15 1 month annualised CPR

Calculated as 1 – ((1 – R) ^ 12) where R is (i) total principal receipts received scheduled and unscheduled during the relevant period, divided by (ii) the aggregate outstanding principal balance of the loans in the expected portfolio as at the start of that period.

16 3 month average CPR

The total principal receipts received during the immediately preceding trust calculation period for the last 3 months divided by the average aggregate current balance of the last 3 months of the loans comprised in the trust property

17 3 month annualised CPR

Calculated as 1 – ((1 – R) ^ 4) where R is (i) total principal receipts received scheduled and unsceduled during the relevant period, divided by (ii) the average aggregate outstanding principal balance over the last 3 months of the loans in the expected portfolio as at the start of that period.

18 12 month average CPR

The total principal receipts received during the immediately preceding trust calculation period for the last 12 months divided by the average aggregate current balance of the last 12 months of the loans comprised in the trust property

All capitalised terms used in this investor report have the meaning or descriptions assigned to them in the Fosse Master Issuer plc base prospectus
