The FCA published guidance on the 20 March 2020 on how they expect mortgage lenders and administrators to treat customers fairly during the coronavirus pandemic.
Mortgage borrowers impacted financially by the coronavirus pandemic should be offered a payment holiday for up to three month
Pursuant to Santander UK plc.'s obligations as Servicer under Principle 6 (A firm must pay due regard to the interests of its customers and treat them fairly) of the FCA Handbook and Mortgage Conduct of Business rule 2.5 . 1 R (A Aim must act honestly, fairly and professionally in accordance with the best interests of its customer)
any such missed payments will not be consididered as arrears for the purposes of investor reporting. Neither will they be reported as having been subject to any forem
This stratification table is being made available to disclose the successful applications for what the Servicer is referring to as an "extraordinary payment holiday
*An account may have more than one loan part therefore the total number of accounts will not be equal to the number of loans reported in other stratification tables

| The then current Seller Share is less than the Minimum Seller Share for two consecutive Trust Calculation Dates. | None |
| The aggregate outstanding principal balance of loans in the Trust is less than the required loan balance on two consecutive Trust Calculation Dates. |  |
|  |  |
| Full details of all trigger events can be found within the Langton Securities (2011-2) plc offering circular |  |

Notes
Current value of mortgages
Total principal amount outstandin
2 Funding Share
fing share is calculated net of accrued interest.
3 Remaining term
This is the remaining term of the loan at the report date in months
Bank of England Base Rate Tracker Loans includes loans issued at a discount or premium to base rate.
Alloans in the Discount category are linked to SVR.
5 Payment Type
Most loans that are not fully repayment mortgages comprise an interest only portion, on which there are no scheduled principal repayments and a
repayment portion for which there is a scheduled amortisation.
Prio to 2008 f LTh
be made on existing loans based on the indexed LTV without carrying out a formal valuation. This occasionally give rise to the unindexed LTV recording an unrealistically high LTV. Indexed and unindexed LTVs include a all further advances on a loan - but exclude exible drawdown reservoir
For the purposes of the Bank of England Market Notice dated 30th November 2010 "defaults" is defined as properties having been taken into possession. 81 month CPR

On any trust calculation date, the total principal receipts received during the immediately preceding trust calculation period divided by the aggregate current balance of the loans comprised in the trust property calculated on the previous trust calculation date in respect of the previous trust calculation period.
91 month annualised CPR
Calculated as $1-\left((1-R)^{\wedge} 12\right)$ where $R$ is (i) total principal receipts received scheduled and unscheduled during the relevant period, divided by (ii) the aggregate outstanding principal balance of the loans in the expected portfolio as at the start of that period
103 month average CPR
郎 total principal receipts received during the immediately preceding trust calculation period for the last 3 months divided by the average aggregate列rent balance of the last 3 months of the loans comprised in the trust property.
Calculated as $1-\left((1-R)^{\wedge} 4\right)$ where $R$ is (i) total principal receipts received scheduled and unscheduled during the relevant period, divided by (ii) the average aggregate outstanding principal balance over the last 3 months of the loans in the expected portfolio as at the start of that period
1212 month average CPR
The total principal receipts received during the immediately preceding trust calculation period for the last 12 months divided by the average aggregate current balance of the last 12 months of the loans comprised in the trust property.
3 Calculation of Minimum Seller Share (as per page 3)
$\mathrm{Y}=$ Flexible draw capacity (Flexible drawdown reservoir of live sub-accounts), multiplied by $8 \%$, multiplied by 3
Z = Balance of Flexible redraws and further advances covered by CCA
14 Calculation of Excess Spread
Excess spread is calculated by dividing the sum of all excess cash available for payments below each of the issuer's reserve funds in their respective waterfalls by the sum of all intercompany loans outstanding
