FUND OBJECTIVE AND POLICY

The Fund's objective is to provide capital growth with the potential for income over a 5+ year time horizon. The Fund will aim to outperform its Target Benchmark over a rolling 3 year period. Average outperformance will typically not exceed 0.30% per annum (after fees) over a rolling 3 year period. No level of outperformance is guaranteed.

The Fund is part of the Santander Multi Index Fund range, funds numbered 1-4 with different levels of risk and potential returns based on exposure to shares (1 the lowest, 4 the highest).

The Fund is actively managed and invests globally (up to 25% in non-developed markets) 80-100% in passively managed Collective Investment Schemes (CIS) (each tracks an index/indices, giving the Fund exposure to multiple indices), gaining exposure of: 50-70% to company shares, including investment trusts; 30-50% to bonds (investment grade or up to 15% sub-investment grade) issued by companies, governments, government bodies and supranationals, typically with higher exposure to Sterling bonds; up to 10% to commodities; and cash, cash like and other money market instruments. The Fund may also invest directly (not in commodities); and up to 5% in actively managed CIS. Derivatives (including passive derivatives) will be used regularly (including for hedging) for efficient portfolio management.
