FUND MANAGER(S)

Multi Asset Solutions Team

The UK Multi Asset Solutions team consists of investment specialists with decades of cumulative experience in managing multi-asset portfolios across a wide range of investment strategies and market environments.

DEFINITIONS

Historic Yield: The sum of distributions announced in the preceding twelve months, divided by the unadjusted MID market price as at date of yield. The historic yield reflects distributions announced over the last twelve months as a percentage of the MID market price as at the date of yield. It does not include any preliminary charge and investors may be subject to tax on their distributions.

FUND OBJECTIVE AND POLICY

The Fund's objective is to provide capital growth, with the potential for income over 5+ years. It will also aim to outperform (after fees) the Target Benchmark over a rolling 3 year period. Average outperformance will typically not exceed 0.40% per annum (not guaranteed). The Fund is part of the Santander Multi Index Fund range, funds numbered 1-4 with different levels of risk and potential returns based on exposure to shares (1 the lowest, 4 the highest).

The Fund is actively managed and invests globally (up to 30% in non-developed markets). 80-100% of the Fund will be invested in passively managed Collective Investment Schemes (CIS), gaining exposure of: 60-90% to company shares, including investment trusts; 10-40% to bonds (investment grade or up to 15% in sub-investment grade), typically with higher exposure to Sterling bonds; up to 10% to commodities; and cash/cash like instruments. The Fund may also invest directly (not in commodities) and up to 5% in actively managed CIS. Derivatives (including passive derivatives) will be used regularly for efficient portfolio management (inc. hedging). The ACD seeks exposure to asset/sub-asset classes, geographies and sectors that it believes will outperform the Target Benchmark. It favours CIS offering attractive returns relative to others (not managed by the ACD/Santander Group). The Target Benchmark has been selected as it is reflective of the Fund's investment policy.

RISK AND REWARD PROFILE

LOWER RISK

HIGHER RISK

← Typically lower rewards →
← Typically higher rewards →

Risk and Reward Indicator: The risk and reward indicator shown above is based on historical data, which may not be a reliable indication for the future risk profile of the Fund. The lowest risk and reward indicator does not mean risk free. The risk and reward indicator shown is not guaranteed and may change over time. The risk and reward indicator is at the level it is because the value of shares and the income from them can fluctuate. The value of bonds issued by companies and governments can also vary, although usually by not as much. This can cause the value of your investment in the Fund to fall as well as to rise. The value of your investment is not guaranteed and you may get back less than the original amount you invested. Investors should refer to the most up to date Key Investor Information Document available from our website.
