Changes to the UK Capital Framework⁴

- The Financial Policy Committee ('FPC') has announced that it is raising the level of the UK counter cyclical buffer ('CCyB') in RWA requirements from 1% to 2% in Dec 20
- The 2% CCyB is deemed to be appropriate in a standard risk environment, however, the FPC stands ready to move the CCyB rate in either direction depending on the economic conditions and the overall risk environment
- In 2020 the PRA will consult to reduce the variable Pillar 2A requirements in a way that leaves the overall loss-absorbing capacity broadly unchanged, unless constrained by Leverage Ratio

1. Distribution restrictions expected to apply if Santander UK's CET1 ratio fell between current Regulatory Minimum Capital level, equal to CRD IV 4.5% minimum plus Pillar 2A and the CRD IV buffers consisting of the Capital Conservation Buffer (CCB) and the countercyclical capital buffer (CCyB). | 2. Current applicable UK CCyB rate is 1.0%. | 3. As of 31 December 2019, Santander UK Group Holdings plc and Santander UK plc Pillar 2A requirements were 5.6% and 5.8%, respectively. | 4.
